Waalwijk, The Netherlands (June 29, 2023)

It is with great pride that we can announce that DRI Rubber – the global leader in reprocessed- and fiber reinforced rubber compounds – has been nominated for the Tyre Devulcanisation Award at this year's Recircle Awards.

The Tyre Devulcanisation Award recognizes particularly noteworthy contributions to the tyre recycling sector. The Recircle Awards – organized by the well-known industry magazines Tyre & Rubber Recycling, Retreading Business and TyreTrends – is a global event designed to recognize the contribution of companies and individuals within the tyre manufacturing-, retreading- and recycling industries towards the Circular Economy.

Waste-to-product

DRI Rubber is the global leader in reprocessed- and fiber reinforced rubber compounds. We reprocess rubber waste streams from the global tire and rubber industry into a wide variety of compounds, materials and finished products. Because of our ['waste-to-product' process](#), we can even achieve end-of-waste, extending the product life cycle, reducing prime material usage and lowering CO-2 footprint.
